Professional Summary

A State Engineer with over 25 years of strategic leadership experience managing biometric systems, technical operations, and digital transformation initiatives within the public sector. Combines deep administrative and governance expertise with advanced technical proficiency in machine learning, data science, and AI-powered solutions, backed by a strong track record of managing public procurement and cross-functional teams to build smart, secure infrastructure.

Areas of Expertise

- Artificial Intelligence & Machine Learning (AI/ML)
- Data Science & Statistical Analysis
- Biometric Systems & Civil Registry Records
- Digital & Cybersecurity Transformation Leadership
- Governance Operations & IT Management
- Public Procurement & International Contract Negotiation
- Computer Engineering, Networking & Systems Maintenance
- Natural Language Processing (NLP) & Strategic Planning

Technical Skills

Programming Languages & Frameworks: Python, TensorFlow, Scikit-learn, Pandas, NumPy, OpenCV, HTML5, CSS3, JavaScript

Advanced AI: Deep Learning, Neural Networks, Natural Language Processing (NLP), AI Agent development

Networking & Systems: Cybersecurity networking, Cisco, LAN/WAN network management, advanced technical support

Project Management & Governance: Digital project management, technical training, compliance frameworks, public procurement

Professional Experience

Civil Status Center Director (National Agency for Population Registry and Secure Documents) 2019 – 2024

Embassy / Consulate General of Mauritania – Jeddah, Kingdom of Saudi Arabia

- Led the full digital transformation of consular operations and government documentation systems.
- Directly oversaw the issuance of smart biometric IDs and digital civil registry services to ensure accuracy and security.
- Coordinated high-level administrative operations and sovereign procurement with various government entities.
- Managed, directed, and improved the performance of cross-functional technical and administrative teams.

Secure Documents Authentication Manager – ANRPTS

2015 – 2019

Mauritania

- Managed the comprehensive national biometric registry and highly sensitive secure document systems.
- Provided technical oversight and authentication auditing for the issuance of passports, electronic IDs, visas, and residence permits.
- Managed and developed IT infrastructure, server protection, and technical operations teams.
- Implemented governance frameworks and enforced strict quality assurance for secure digital output.

Procurement Committee Member (CIMAC) – ANRPTS

2016 – 2018

Mauritania

- Conducted technical and financial evaluation and approval of major technical and sovereign procurement contracts.
- Ensured full compliance with local and international governance standards, transparency, and risk mitigation.

Public Procurement Officer – National AIDS Control Program

2005 – 2011

Mauritania

- Managed the complete logistical and technical procurement cycle and negotiated complex contracts.
- Coordinated directly and ensured compliance with international partners, including World Bank entities and affiliated organizations.
- Ensured regulatory, legal, and financial compliance in managing allocated budgets.

Secretary General – Mbrouk Municipality

2006 – 2011

Mauritania

- Managed and directed the municipality's senior administrative and financial operations.
- Oversaw public service delivery and local governance processes.

IT Center Supervisor & Maintenance Engineer – Dar Al Computer

2002 – 2005

Mauritania

- Provided technical and operational oversight of the company's IT centers across 7 major cities.
- Managed and designed network infrastructure and maintained critical systems and servers.
- Delivered advanced technical training for staff and emerging government projects.

IT Trainer & Maintenance Engineer

2003 – 2008

Star Technologies & Perfect Consult

- Provided professional training on software solutions and the implementation of modern digital systems for institutions.
- Supported and guided regional development and training programs and digital capacity-building.

IT Trainer – Iqraa Institute

2000 – 2002

Mauritania

- Delivered digital literacy programs and foundational training in IT and computing.

Education

State Engineer in Electronics and Digital Development (Baccalaureate + 5 years)

Intensive five-year integrated engineering program | 1992 – 1997

Professional Certifications & Credential Badges

- Certified Python Coder Badge – Kaggle Global Platform | June 2026
- Agent of Discord Developer Badge – Kaggle Platform in collaboration with Google | June 2026
- Code Uploader Badge – Kaggle Global Platform | June 2026
- Kaggle Community Member – Kaggle Global Platform | March 2026
- Machine Learning Specialization – Stanford University in collaboration with Coursera | 2025
- Deep Learning Specialization – DeepLearning.AI | 2025
- Python for Data Science and AI Certificate – IBM | 2024
- Professional Business Administration Diploma – United Academy for Training and Management | 2021

Engineering & Software Projects (Selected)

PropAI – Instant Smart Real Estate Valuation Platform

Designed and built a full-stack web application and smart engine that inventories and analyzes real estate records to automatically predict fair market value, including dashboards and an AI chat advisor. Link: ahmedvall70.github.io/AhmedVall_PropAI/

Interactive Digital CV Website

Developed and engineered a full personal portfolio hosted on GitHub showcasing engineering experience and technical projects, using advanced interfaces and JavaScript-driven animations. Link: ahmedvall70.github.io/ahmed-vall-cv/

Interactive AI Agents Development

Applied advanced Kaggle-certified Python skills to develop interactive AI agents and systems integrated with smart programming environments such as Discord.

Prediction, Fraud Detection & Real Estate Models

Built advanced machine learning models (Random Forest, Linear Regression), such as a Saudi real estate price predictor, to forecast statistical variables and detect anomalous patterns in large datasets.

Sentiment Analysis Tools (NLP)

Developed advanced tools for processing and analyzing Arabic and English text based on neural networks.

Live Deep Learning Applications

Applied convolutional and recurrent neural network models (CNN, LSTM) to real-world use cases such as image processing and time-series data.

Languages

Arabic: Native speaker (full proficiency)

French: Fluent (spoken and written)

English: Intermediate (ongoing professional development)
